Jesús Hernández

Frontend Developer Flutter/Dart

Software developer dedicated to producing high-quality, readable, well-documented, and functional code. Always looking for the next project or challenge that will help improve my training and performance.
Software development enthusiast, with experience in Flutter since it was in its Beta version.

- http

PROFESSIONAL EXPERIENCE

03/2022 – 1/2023
(Havana - Cuba)

Root101- High technology company, CITMATEL
Frontend/Game developer
Achievements / Tasks:
- Design and build of the flow and architecture of the game.
- Development of **cross-platform** mobile applications using **Dart** and **Flutter** as framework.
- Analysis of user requirements and translation of customer needs into **iOS** and **Android** application designs.
- Use of the **Clean** architecture, as well as the **Get** package, to improve the sustainability and adaptability of the code.
- Use of **Git** as a version control system (+ **GitKraken** and **GitHub**).
- Design and implementation of databases using **ObjectBox**.

2015 - 2023
(Havana - Cuba)

Feelancer,
Full-Stack developer
Achievements / Tasks:
- Remote work with several clients and delivery dates.
- Development of projects applying **SCRUM** methodology and project managers such as: **Jira**, **Trello**, **ClickUp** and **Miro**.
- Analysis of requirements and translation of the client's needs into a correct design and development of the system.
- Backend development using **Java/Spring**.
- Integration with third party services such as **Stripe**, **Google Auth**, **Docusign**, **Monday**, **QuickBooks** among other private APIs.

2018 - 2023
(Havana - Cuba)

Feelancer,
Contribution to the community
Improvements in public packages like:
- **flutter_zoom_drawer:** Developer of the minimalist example to reduce complexity in the use of the package. **Issue #67**
- **circular_countdown_timer:** Development of new functionality to customize the way text is formatted. **PR #35**
- **flutter_background_service:** Correction of issue related to the display of **local_notifications**. **Issue #265**
