Jesús Hernández

Backend Developer Java/Spring

Software developer dedicated to produce high-quality, readable, well-documented, and functional code. Always looking for the next project or challenge that will help me improve my training and performance.

Software development enthusiast, with more than 8 years of experience using Java and Spring Framework.

📞 +53 5 426 8660 ✉️ jhernandezb96@gmail.com 📍 Havana, Cuba

Version control:
- GIT
- GitKraken GUI
- GitHub
- Bitbucket

Databases:
- MySQL
- PostgreSQL
- MongoDB
- ObjectBox

Cloud:
- AWS
- Railway
- Render
- Putty(SSH Client)

Third party api:
- Docusign
- Fluidpay
- QuickBooks
- Monday

PROFESSIONAL EXPERIENCE

03/2022 – 08/2023
(Havana - Cuba)

DelMar Tech Group,
Backend developer
Achievements / Tasks:
- Development of **REST APIs** using Spring Framework following **OpenAPI** standards.
- Design and implementation of **MVC** and **Clean** architectures, and **SOLID** principles.
- Integration with third-party applications via **APIs REST**, **GraphQL**, **SFTP** and **IMAP**, such as: Docusign, Fluidpay, QuickBooks, Monday, Gmail, Outlook and Protonmail, among other private ones.
- Efficient design and implementation of data structuring in **MySQL** and **PostgreSQL** databases.
- Code version control using **Git**, and database version control using **Flyway** between several deployment environments.
- Constant communication with third party support teams, as well as working with different roles such as frontend, QA, project manager and customer.

2015 - 2023
(Havana - Cuba)

Feelancer,
Backend developer
Achievements / Tasks:
- Remote work with several clients and delivery dates.
- Development of projects applying **SCRUM** methodology and project managers such as: **Jira**, **Trello**, **ClickUp**, **GitHub Issues** and **Miro**.
- Analysis of requirements and translation of the client's needs into a correct design and development of the system.
- Deployment of **Docker** containers in Cloud environments such as **AWS**, **Railway** and **Render**.
- Design and implementation of Databases used different engines.
- Integration with payment gateways such as **Fluidpay** and **Stripe**.
